Mental Health Facts
CHILDREN & TEENS

Fact: 1 in 5 children ages 13-18 have, or will have a serious mental illness.

- **20%** of youth ages 13-18 live with a mental health condition
- **11%** of youth have a mood disorder
- **10%** of youth have a behavior or conduct disorder
- **8%** of youth have an anxiety disorder

**Impact**

- **50%** of all lifetime cases of mental illness begin by age 14 and 75% by age 24.
- The average delay between onset of symptoms and intervention is 8-10 years.
- **50%** of students age 14 and older with a mental illness drop out of high school.
- **70%** of youth in state and local juvenile justice systems have a mental illness.

**Suicide**

- **2nd** leading cause of death in youth ages 10 - 24.
- Approximately 50% of students age 14 and older with a mental illness drop out of high school.
- **90%** of those who died by suicide had an underlying mental illness.

**Warning Signs**

- Feeling very sad or withdrawn for more than 2 weeks (e.g., crying regularly, feeling fatigued, feeling unmotivated).
- Trying to harm or kill oneself or making plans to do so.
- Out-of-control, risk-taking behaviors that can cause harm to self or others.
- Sudden overwhelming fear for no reason, sometimes with a racing heart, physical discomfort or fast breathing.
- Not eating, throwing up or using laxatives to lose weight; significant weight loss or gain.
- Severe mood swings that cause problems in relationships.
- Repeated use of drugs or alcohol.
- Drastic changes in behavior, personality or sleeping habits (e.g., waking up early and acting agitated).
- Extreme difficulty in concentrating or staying still that can lead to failure in school.
- Intense worries or fears that get in the way of daily activities like hanging out with friends or going to classes.

**4 Things Parents Can Do**

- Talk with your pediatrician
- Get a referral to a mental health specialist
- Work with the school
- Connect with other families
